PATIENT IDENTIFICATION LABEL

**Indication:**

A focused ultrasound exam of the gallbladder and right upper quadrant was performed to evaluate for gallstones, cholecystitis, and cholestasis in this patient. The ultrasound was performed with the following indications, as noted in the H&P:

- Abdominal pain
- Nausea / Vomiting
- Flank pain
- Fever
- Jaundice
- Pancreatitis
- Other indications as noted in the H&P

**Identified structures:**

The gallbladder, gallbladder wall, common bile duct, liver, and porta hepatis were examined.

**Findings:** Exam of the above structures revealed the following findings:

- Gallstones:  Absent  Present
- Sludge:  Absent  Present
- Sonographic Murphy:  Absent  Present
- Pericholecystic fluid:  Absent  Present
- Intrahepatic cholestasis:  Absent  Present
- Maximal GB wall thickness (mm): \_\_\_\_\_  Normal  Abnormal
- Common bile duct in transverse (mm): \_\_\_\_\_  Normal  Abnormal
- Other: \_\_\_\_\_

**Impression:**

- Normal gallbladder ultrasound
- Cholelithiasis
- Cholecystitis
- Other: \_\_\_\_\_
