

Adult Emergency Department
Emergency Ultrasound
Limited Renal Exam
Page 1 of 1

Patient Name _____
MRN _____
PATIENT IDENTIFICATION LABEL

Indication:

Indication: A focused ultrasound of the kidneys was performed to evaluate for hydronephrosis and nephrolithiasis. The ultrasound was performed with the following indications, as noted in the H&P:

- Abdominal or flank pain
- Back pain
- Groin pain
- Hematuria
- Acute renal failure
- Anuria
- Other indications as noted in the H&P

Identified structures:

- Right kidney
- Left kidney
- Bladder

Findings: Exam of the above structures revealed the following findings:

- Hydronephrosis: Absent Present
- If present:** Left Right Both
- If present:** Grade 1 Grade 2 Grade 3
- Intrarenal Calculi: Absent Present
- If present:** Left Right Both
- Ureteral Calculi: Absent Present
- If present:** Left Right Both
- Vesicular Calculi: Absent Present

Other findings: _____

Impression:

- Normal limited renal ultrasound, no evidence of hydronephrosis or calculi
- Hydronephrosis
- Nephrolithiasis
- Other: _____
